Claims 1-18 are rejected under 35 USC 102 as being anticipated by Takeuchi (257) for the specific reasons set forth in the previous office action (5-19-05).

Applicant appears to argue that Takeuchi does not anticipate the claims because Takeuchi, allegedly, does not produce of his device using thin film methodology. Firstly, the method of manufacturing a device is not germane to the patentability of the device structure. Takeuchi has pointed out in the previous office action clearly teaches the exact structure claimed by applicant. Secondly, the claims defined a "thin-film", not a device produced by thin-film methods. Takeuchi teaches the thickness of the stub straight to be preferably not more than 15 μm and a piezoelectric film of only 3 μm . The examiner feels that it is reasonable to interpret a this convention as thin. (See column 12 lines 5-52). Thirdly, Takeuchi clearly and explicitly teaches the device can be formed by either thick or thin film forming methods (lines 19-27). The examiner apologizes for the typographical errors that led to claim 18 not being specifically mentioned in the previous office action. The symmetry taught in Takeuchi figure 14 meets the structural requirements of claim 18; that is, the differential pairs of piezoelectric elements (for example the outer segments 19b opposite each other along the x-axis are considered to form a pair of differential thin-film piezoelectric elements.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
